

Calculator Microservice with Node.js & Express

Introduction

This project is a RESTful API microservice that performs basic arithmetic operations, including Addition, Subtraction, Multiplication, and Division. It is built using Node.js and Express.js, with Winston for logging.

Project Setup

1. Create a Project Folder

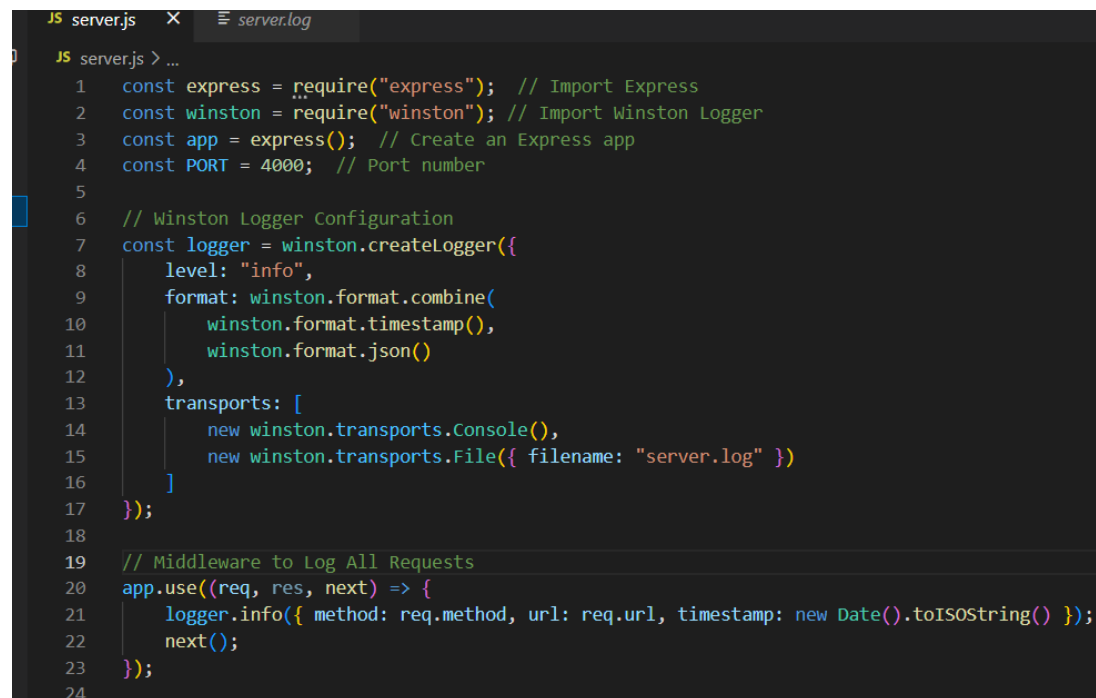

2. Initialize a Node.js Project

```
npm init -y
```

3. Install Required Dependencies

```
npm install express winston
```

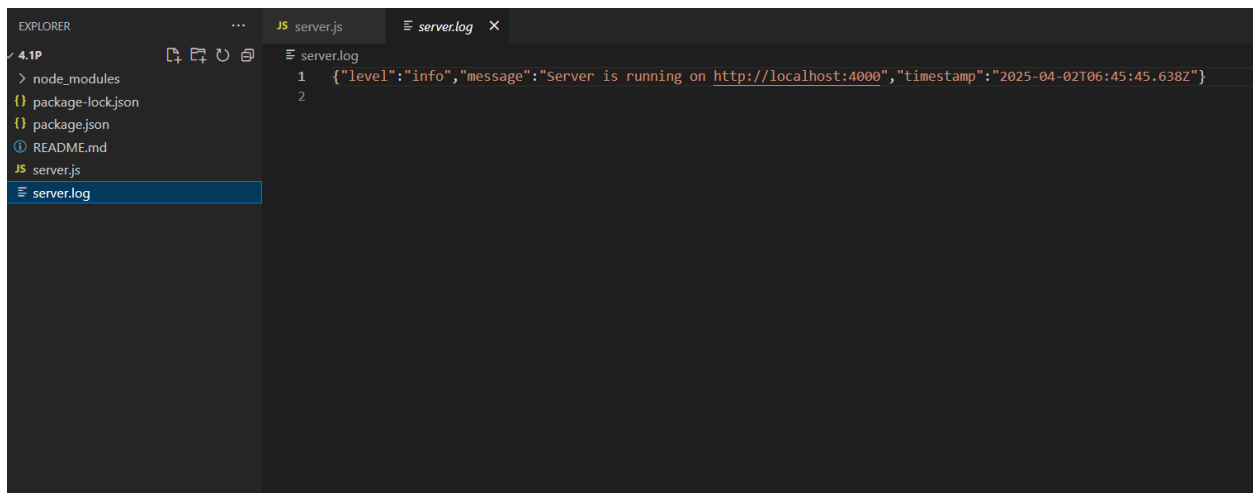

Winston Logger Setup

A screenshot of a code editor with a dark theme. The editor shows a file named 'server.js' with the following code:

```
1  const express = require("express"); // Import Express
2  const winston = require("winston"); // Import Winston Logger
3  const app = express(); // Create an Express app
4  const PORT = 4000; // Port number
5
6  // Winston Logger Configuration
7  const logger = winston.createLogger({
8    level: "info",
9    format: winston.format.combine(
10      winston.format.timestamp(),
11      winston.format.json()
12    ),
13    transports: [
14      new winston.transports.Console(),
15      new winston.transports.File({ filename: "server.log" })
16    ]
17  });
18
19 // Middleware to Log All Requests
20 app.use((req, res, next) => {
21   logger.info({ method: req.method, url: req.url, timestamp: new Date().toISOString() });
22   next();
23 });
24
```

Viewing Logs in Real-Time

```
Get-Content logs/combined.log -Wait
```

Setting Up Git and Pushing to GitHub

git init

git add .

git commit -m "Initial commit"

git remote add origin <https://github.com/AkankshaNunakani/sit737-2025-prac4p>

git branch -M main

git push -u origin main

<https://github.com/AkankshaNunakani/sit737-2025-prac4p>

Running the Server

node server.js

API Endpoints

- **Addition:** <http://localhost:4000/add?num1=5&num2=3>

Result: 8

- **Subtraction:** <http://localhost:4000/subtract?num1=10&num2=4>

Result: 2

- **Multiplication:** <http://localhost:4000/multiply?num1=7&num2=2>

Result: 15

- **Division:** <http://localhost:4000/divide?num1=20&num2=5>

Result: 1.6666666666666667

Conclusion

This project demonstrates a simple arithmetic microservice using Node.js, Express, and Winston for logging. Logs provide a clear history of requests and errors, making debugging easier.
